DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Species B in the reply filed on 11/01/04 is acknowledged. The traversal is on the ground(s) that all the species are classified in the same class and subclass and could be searched in one search. Applicant also agreed that the species are being claimed separately by the groupings stated in page 6 of the response. The requirement is still deemed proper because the species are distinctly claimed. Moreover, claim 12 has been withdrawn for depending on withdrawn claim 11. Only claims 1-7 have been examined on the merits.

The requirement is still deemed proper and is therefore made FINAL.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: "700", see page 9, line 18. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified

Art Unit: 3683

and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: the numeral references starting from page 10, line 17 to page 11 line 2, need to be change to 800's to match figure 17.

Appropriate correction is required.

Claim Objections

4. Claim 2 is objected to because of the following informalities: line 2, "pin", first occurrence, needs to be deleted; since claim 1 only mentions "electrically controlled locking mechanism". Appropriate correction is required.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 3683

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1 and 2 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,719,318. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of the patent is broader in scope and would have encompassed claims 1 and 2 of the instant application.

Allowable Subject Matter

7. Claims 3-7 are allowed.

8. The following is a statement of reasons for the indication of allowable subject matter: It is found that the claimed feature "an electronically controlled locking pin mechanism adapted to extend through the hitch tube and said hitch insert" defines over the prior art of record.
